

LSE Data Usage

Over one half of LSE students recieved their phones at 9 years of age or younger!

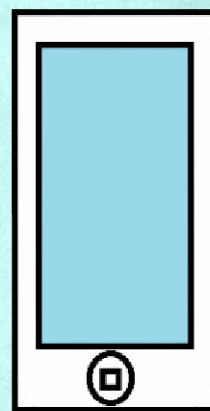

One half of 4th and 5th grade students use their own mobile device.

About a quarter of LSE adults play/ use 25+ apps. Only 38% of that quarter of that uses 1-2 gaming apps.

Did you know...

- 19% of LSE parents got their first phones at ages 36-40.
- One of the most favorite attributes about LSE students' and adults' hand held devices are the touch screens.
- 30% of LSE students have over 200 friends that own a mobile device.
- On an average day, 34% of students use apps for over 2 hours.

Can you believe the first iPhone came out in 2007? That means your parents didn't get their iPhone until they were a lot older than you are right now!

12% of students check their hand-held device (s) 31+ times per day.

17% of parents check their phone per day for r

Gaming apps are used more than social and media apps.
