A Class Project from Miss Kelly's Second Graders
at Lake Sybelia Elementary School

Miss Kelly's second graders have been studying dinosaurs! During our study we became very curious about dinosaur names. After reading more about how dinosaurs are named, we thought that we would like to try it out. Once we finished, we wanted to find out what some real scientists would think of our work.

We hope you enjoy our work. Please send us comments or feedback to: deirdre.kelly@ocps.net

Thank you for your time and talent.
